

REACH (EC) No. 1907/2006 Certificate of Compliance

The papers produced by Arjowiggins Graphic and supplied to our customers are considered as 'Articles' within the REACH regulations and therefore are not required to be registered. However, as a user of chemical substances, Arjowiggins Graphic takes all necessary steps to ensure that the impact of REACH on our own raw material purchases will not influence the range of products, the quality or the current standards of chemical safety of our paper.

In this respect Arjowiggins Graphic certifies that formulations of all Graphic Printing & Writing papers **are compliant with the restrictions of use of certain hazardous substances, mixtures and articles listed in the Annex XVII** of the regulation.

The REACH Article 33 requires manufacturers and distributors of Articles to inform their customers if an Article contains more than 0,1% (1000 ppm) weight by weight (w/w) of any Candidate List Substance of Very High Concern (SVHC).

In this respect Arjowiggins Graphic certifies that all **Graphic Printing & Writing papers do not contain any Substance of Very High Concern (SVHC)** as detailed within the last to date list of Restricted substances.

This certificate is based on the formulations at this date and established to be worth that of right.
