

SK-4 Ink

Introduction

Icontek(SK4) Japan Seiko heads special solvent ink, all adopts imported pigment and supplement, for Japanese Seiko corporation heads design (SEIKO SPT-510/35 PL, SPT-255 /35PL), the ink can restore wider color, with strong durability and storage stability.

1、 Extend The Life-time Of Printheads

SK4 ink keep heads clean, Superfine0.2 micron filtration precision prevent plug phenomenon, enhance head' s life-time greatly.

2、 Stable In Performance

The ink in the development and production of the manufacturing process using advanced technology to make it in the different environment and temperature is very stable, without mixing before use, and storage period up to eighteen months with the same performance.

3、 Strong Durability

Strong outdoor UV performance. After high strength ultraviolet irradiation showed, in uncoated any protective coating conditions, can keep the image color of two years of above.

4、 Wider Color Gamut

For you to provide the true colors of cyan (C), red (M), yellow (Y) and black (K), can produce bright red (R), green (G), blue (B), hundreds of thousands of colors, give your image incomparable color performance.

SUITABLE FOR USE: SPT-510/35pL & SPT-255/35pl heads of all of ICONTEK' s machine.
